360° ROTATION
Customize your cant (angle) in one fluid motion.

CUSTOM FIT
A set of comfortable, customizable straps can be adjusted to provide you with all-day comfort.

ADAPTABLE DESIGN
With a single platform, carry your ShapeShift™ and Cloak™ Mag Carriers in the drop leg position!

COMPATIBLE WITH MOD OWB HOLSTER
DROP LEG HOLSTER

Military Grade. Civilian Certified.™

Free up your waistband and carry on your thigh with the ShapeShift™ Drop Leg Holster. This incredibly versatile carry position is ready to adapt to every environment!

› Discover a new way to carry.
Your drop leg holster offers customizable ride height and can be worn on either leg. If you choose to wear it on the opposite leg, simply transfer the rotating adapter to the opposite side of the Shift Shell. Be sure to wear a supportive gun belt with your drop leg holster. Also, ensure your firearm is unloaded and safe prior to the following steps.

1. **Attach the strap!**

Determine where you would like to wear your thigh holster. We recommend the 3 o’clock position. Pull the primary strap behind your belt, then squeeze the two strips of Velcro together.

2. **Crease the top of the primary strap.**

To lock in your ride height, pinch the primary strap over the top of your belt. This will add a crease at the top of your strap and keep your thigh holster in place.

3. **Buckle up!**

Beginning with the upper strap, wrap it around your thigh and buckle it. Repeat this process with the lower strap. Adjust each strap to your preferred fit. Thread any excess strap through the keeper and the thigh plate.

4. **Holster your firearm.**

Carefully and slowly, insert the pistol and make sure there is no clothing or obstruction in the holster that can catch the trigger.
Both the ShapeShift™ Drop Leg Holster and Drop Leg Mag Carrier are designed with adjustable ride height. Choose between three distinct ride height levels to accommodate your draw!

1. **Detach your primary strap.**
   Tear the Velcro at the bottom of the strap, then pull the entire strap through the thigh plate.

2. **Remove the Holster Mount.**
   Using the provided Allen key, unscrew the four ½” flat head screws from the back of the thigh plate. Set these aside.
   *NOTE: If applicable, remove your Double Mag Attachment.*

3. **Choose your ride height.**
   To carry higher on your leg, loop your Velcro strap through the bottom slot of the Thigh Plate. To carry lower on your leg, loop the Velcro strap through the upper slot.

4. **Reattach your Holster Mount.**
   Using four weld nuts and ½” flat head screws, reattach the Holster Mount to the Thigh Plate.
   *NOTE: If applicable, reattach your Double Mag Attachment.*

5. **Lock in your ride height.**
   If you are using the middle or high ride height level, thread the primary strap through the top of your thigh plate. Now you are ready to carry!
To carry in the drop leg position, you will need to utilize the **full shell configuration**. If you ordered the complete ShapeShift™ Drop Leg Holster, your shell will be preassembled in this configuration. If you purchased the Drop Leg Carry Expansion Pack, you will need to shift your separately sold Shift Shell into the full shell configuration using the steps below.

1. If you would like to use a thumb release with your Drop Leg holster, begin by sliding the shells apart. If you do not want to use a Thumb Release, please proceed to Step 3.

   **Caution:**
   *Take care not to pinch your skin while sliding the shell.*

2. Insert one narrow hex nut into your thumb release, then place your thumb release into the recess of the trigger guard. Attach the thumb release to the holster with a 1/2” flat head screw.

3. Slide the shells together using the interlocking rails.

   Ensure the interlocking rails line up while pushing the shells together. If the center rail is aligned, the remaining rails will slide into place.

4. Secure the shells by adding a twist lock to the top and bottom of the Shift Shell. To complete your holster, please proceed to page 5.
ASSEMBLING YOUR DROP LEG HOLSTER

This carry position requires the full shell configuration. See page 4.

1

Prepare to dock.

Keeping your Primary Strap attached to the Thigh Plate, attach the Holster Mount to the Thigh Plate using four weld nuts and four 1/2” flat head screws. Pull the strap out of the way so you can access the screws.

NOTE: The ShapeShift™ Drop Leg Holster and Expansion Pack come pre-assembled with the holster mount.

2

Choose your angle.

Attach the Rotating Adapter to the Thigh Plate by holding down the button located on the holster mount. Press the shell and Thigh Plate together until the button comes out and the two pieces are secure.

CUSTOMIZE YOUR RETENTION

Your Adjustable Retention Unit, which is included with your complete ShapeShift™ Drop Leg Holster, can be tightened by turning the wheel with a twist lock. Spin clockwise to increase your retention.

Additionally, the Adjustable Retention Unit can repositioned to the opposite side of the trigger guard for further optimization.

To Detach your Adjustable Retention Unit, untwist the twist locks from the top and bottom of your Shift Shell, then slide the two shells apart. Next, unscrew the 1/2” flat head screw from the Shift Shell using the Allen Key provided in your parts pack (Don’t lose the hex nut).

TIPS

1. Many factors can affect your holster’s retention:
   - draw angle
   - firearm model
   - carry position

2. Be sure to practice drawing your firearm while wearing your holster just as you would in a real-life scenario.

3. Pay attention to the twist of your wrist as you draw your firearm as this will greatly affect the performance of your retention settings.
DROP LEG MAG CARRIER

Anything but Ordinary.

The most advanced, convenient way to carry your spare magazines has landed with the all-new Drop Leg Mag Carrier. This versatile platform comfortably holds up to four spare mags at a time.

› Carry more magazines than ever before.
HOW TO CARRY SPARE MAGS

The Drop Leg can carry up to four spare magazines. To carry four spare magazines, please proceed to the next set of steps.

1 Unlock the button slide.

Ensure the slide lock is rotated out of the way to allow the button slide to move freely.

2 Mount your buckets.

To mount each adjustable bucket, push the button slide in as you connect them to the mag adapter. Attach the buckets at your preferred angle.

3 Secure your magazines.

Turn the button lock 90 degrees to engage the locking mechanism.

CARRY UP TO FOUR MAGS

To carry four spare magazines on one drop leg, you will need to utilize the Double Mag Attachment.

Install the Double Mag Attachment.

Using four 8-32 weld nuts and ½” flat head screws, attach the Double Mag Attachment to the Thigh Plate.

NOTE: Be sure to keep your primary strap attached to the Thigh Plate.
1 Retrieve your Allen Key.
Push the button slide on the front of the adjustable bucket until the hidden Allen Key is exposed. While holding the button slide, pry and rotate the Allen Key up and out of the storage area.

2 Make some space.
Back out all three screws on your adjustable bucket to the point that your magazine slides in without issue. Keep your magazine inserted for the next step.

3 Customize your retention.
Tighten the three screws on the back of your mag carrier until the inner wall of the adjustable bucket sits flush with your magazine. Your magazine should slide in and out with light resistance. Replace your Allen Key.
Your ShapeShift™ Holster is just one part of an entire system of carry possibilities. Look forward to the release of ShapeShift™ Expansion Packs like Shoulder, Ankle, MOLLE, and more! Sign up for our email newsletter for updates as expansion packs and accessories become available.

Disclaimer of Liability

By accepting delivery of your Alien Gear Holsters order you acknowledge and agree to the following conditions:

Firearms are dangerous instruments and should be handled only by responsible persons who have completed a certified training course in the safe handling and use of firearms. YOU, THE CONSUMER, ASSUME ANY AND ALL RISK ASSOCIATED WITH THE PURCHASE AND USE OF ALIEN GEAR HOLSTERS’ PRODUCTS. BECAUSE ALIEN GEAR HOLSTERS HAS NO CONTROL OVER HOW ITS PRODUCTS WILL BE USED, OR WHO SUCH PRODUCTS WILL BE USED BY AFTER PURCHASE, ALIEN GEAR HOLSTERS DISCLAIMS ANY AND ALL LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES TO PERSON(S) AND/OR PROPERTY RESULTING FROM THE USE OF ANY ALIEN GEAR HOLSTERS’ PRODUCTS. YOU, THE CONSUMER, ASSUME ALL RISK OF PERSONAL INJURY OR DEATH CLAIMS AS A RESULT OF YOUR USE OF ALIEN GEAR HOLSTERS’ PRODUCTS.

It is your responsibility as the consumer to personally check for holster and handgun compatibility. Although Alien Gear Holsters makes every effort to construct its products to fit the most current handgun models, manufacturers of handguns constantly update their products. Slight manufacturing changes in a handgun model can affect the proper and safe fit of your handgun and holster. Alien Gear Holsters will not be responsible for such changes or for typographical or other errors which may occur in the ordering of a holster from Alien Gear Holsters.

In addition, Alien Gear Holsters are designed to fit factory equipped handguns. The use of trigger shoes or grip adapters, laser sights or any other alterations to the frame, or dimensions of the handgun itself, may cause improper holster fit and negligent discharge. Do not alter your holster in any way. An alteration to your holster may result in an unsafe fit for your handgun and possible negligent discharge.

Never place a loaded handgun in a holster without first testing holster and handgun compatibility and fit using your handgun in an unloaded condition [double-check to make sure the chamber is empty]. For information on how to safely carry your particular handgun, please refer to your handgun manufacturer’s safety and instruction manual.

Make certain that your handgun is securely seated in the holster each time you holster your handgun before removing your hand from the grip. A handgun must snugly fit in its holster to guard against accidental separation of the handgun from the holster. Never place your hand in front of the firearm barrel while trying to holster or un-holster your firearm. Keep your finger off the trigger until you are ready to shoot. Keep fingers off the trigger and out of the trigger guard when drawing or replacing the handgun in the holster.

Should your holster become worn, loose, defective, or ill-fitting at any time, immediately cease use of your holster and contact Alien Gear Holsters for warranty coverage instructions.
